2. Project Overview

Name

Product, Architecture

Score

10

Max Score

15

Some Questions

What are the main services, components and roles? How is the product architecture structured? At what development phase is product now?

Nosana provides a distributed GPU grid for renting compute power without overhead, excessive fees, or lock-in. It addresses the GPU shortage by utilizing underused hardware like gaming PCs, miners, and MacBooks, offering competitive prices for AI solutions.

The platform enables AI users to access affordable GPUs and allows GPU owners to earn income by renting out their hardware, with tools like easy-to-use APIs and flexible pricing.

the architecture is thoroughly described in the docs

Backers & Partners

Score

15

Max Score

15

Some Questions

Who is leading the current round, previous rounds? What is the reputation of backers and Partners?

gate.io startup, solanium, petrock capital

Alternative Resource With Web3 VCs Ranking 7

Team & Advisors

Score

10

Max Score

10

Some Questions

What is the practic crypto and profile background? Have they been a members of hackathons or incubators? How advisors can help to project?

the team experience is rich in the realm of blockchain

Name

Market & Competitors

Score

10

Max Score

10

Some Questions

How much liquidity can provide the target market? Who are competitors and how product can attract their Audience?

Unlike other compute clients on the Render Network, Nosana focuses specifically on developers of AI inference models and applications, serving a unique niche market.

Some Questions

Do services and business models really need a token, or can it be replaced with stablecoins?

No, it cannot be replaced with a stablecoin

Are the key roles in the product architecture interested in earning or purchasing the token? What factors drive demand?

"exchange for NOS tokens, you can use our network to run CICD for all your development projects",

How does the DAO and Treasury work?

Community voting by nos token holders
