Some Questions

There are FAQs, a Knowledge base, a Whitepaper, a blog, and all the links to social media platforms, a log in to an Artist Portal, extensive info on grants with a quick submission, everything works, the design is ok.

The FAQs don't work.

Some Questions

There are other projects in cloud rendering via blockchain like Aethir, still, they are so rare and all provide a unique solution.

The Render Network provides unique value to its target audience, as the lack of computing powers for 3D rendering is an evident problem for 3D content creators.

Some Questions

The main revenue streams are clear. They come from 3D artists willing to use the Render Network's main service, which is to rent computing powers to render on the platform.

Their roadmap builds upon the community proposals – RNPs, and the RNPs are openly discussed, voting results are disclosed.

Some Questions

The Render Network native token serves for governance and decision-making, so it cannot be replaced with a stablecoin.

Governance: Render Network Proposal System, RNPs (community members proposals for the future of the Network)
